

# Questions to Ask Your Doctor

## About a Treatment for Invasive Aspergillosis

Have you diagnosed invasive aspergillosis? If so, where is it?

Do you know the genus/species?

Have you performed antifungal susceptibility testing? If not, is this something that you can obtain?

What drug are you going to use first?

How do I take that medication?

For how long will I have to take that medication? Will you have to make any changes?

Will this drug interact with any of my other medications?

How do you know if the medication is working?

What are the side effects?

What is the cost of the medication? How will you help me with insurance?

What will we do if it does not work?

Will I need any other treatments? (e.g., surgery)?

Do you think I am an appropriate candidate for a clinical trial? Why or why not?
